Peaceful Living with Our Wildest Neighbors

Help us conduct a wildlife survey of North Kitsap! As part of the North Kitsap Trails Association project to link our communities with trails, we are conducting a wildlife habitat survey. We would like the community's help.

Just tell us where and when you have seen wildlife, and what kind. We especially want to know the general areas that are habitat for black bear, coyote, beavers, otters, deer, bobcats, mink, migrating birds, cougars, and anything unusual or changes in patterns.

Please note the location by road, address or waterway, so that we can mark it on a map. Here's the easy way to report your information: send an email to info@Stillwatersenvironmentalcenter.org, or jot a note and mail it to Stillwaters; 26059 Barber Cut Off Road; Kingston 98346. Thanks for your help!
