

NORTH KITSAP TRAILS

Let's start planning our trails for walking, biking, running and horseback riding in North Kitsap!

This guide will assist you in the field when locating and identifying existing and potential trails. It gives you questions to ask yourself and places to write things down. Attach this guide to a map showing what part of the trail it pertains to!

It would be best to take a small section of the trail area at a time (1 - 2 miles).

Make it manageable!

This Trail Finder's Survey is not inclusive of all issues that will need to be addressed but will help with the basics.

Happy Trails!

North Kitsap Trails

Trail Finder's
Survey

LAND ROUTES

February, 2008

What section does this pertain to?

-
1. Are there any existing trails in this section?
Yes No
 2. If so, where?
(describe location or give coordinates)

 3. Where do connections need to be made in this section?
(describe location or give coordinates)

 4. Are there existing logging roads that can be utilized in this section?
Yes No
 5. How long is the existing trail?

 6. How many feet will the new trail need to be in this section? (give estimate)

 7. Is it steep, rolling, flat, forested, ravines, streams, wetlands, road crossings, meadow, road-side? (list all that pertain to this trail section)

 8. What are the unique habitat features?

9. Does a future trail need to be located on an individual land owner's property in this section?
Yes No
10. Has the landowner been contacted by you?
Yes No
11. Does an easement leader need to contact the landowner?
Yes No
12. Who is the landowner and what is their address?

13. What was their response?

14. Does the future trail in this section need to run along the road edge? (If yes, describe where)

15. Is there a private road that can be utilized?
Yes No
16. What is the name of the private road?

17. Who needs to be asked for permission?

18. What percentage of construction do you think the trails in this section will need to bring up to walking standards? (give percentage of entire length, i.e. 50% of entire length? 100% of entire length?)

19. Where is the access and nearest parking area?

Don't forget to attach a map & highlight the section you are working on.
